

ENVIRONMENTAL POLICY

Evostyle is committed to the continual improvement of our Environmental Management System to not only enhance our environmental performance as a company, but to play our part in the protection and sustainability of the wider environment.

We are aware that manufacturing has an impact on the environment, so we try to limit this impact as much as possible by being environmentally responsible and thoughtful in how we operate day-to-day.

We are committed to:

- reducing our impact on the environment
- reducing the waste we generate
- recycle unavoidable waste wherever possible
- use materials that are recycled, recyclable or biodegradable whenever possible
- reduce our carbon emissions
- ensure our employees are aware of their use of energy that impacts the environment
- meet all necessary current Australian legislative requirements and regulations

We do this by:

- Purchasing our timber from sustainable sources (FSC certified wholesalers)
- Refusing to purchase or manufacture using Rainforest timber species
- Repurposing timber offcuts into other products we manufacture (e.g. small products or Evove panels)
- Collecting all our sawdust and delivering it to companies who use it for animal bedding (chickens etc.)
- Donate any offcuts unsuitable for re-manufacturing to Men's Shed organisations for them to use on small projects
- Limiting the use of packaging materials by sending out products either loose or in recyclable cardboard boxes
- Re-using existing packaging where possible
- Separating all waste material for recycling (paper & cardboard / metals / timber etc)
- Implementing a Product Stewardship Scheme so that consumers have the option to donate their Evostyle made timber products back to us for re-use
